JOINT NATURE CONSERVATION COMMITTEE

Report distribution

Report Number: No. 237

Contract Number/JNCC project number: F71-12-332

Date received: 9 June 1995

Report title: Checklist of reptiles and amphibians listed in the CITES appendices

Contract title: Revise Checklists of CITES species database

Contractor: World Conservation Monitoring Centre
219 Huntingdon Road, Cambridge, CB3 0DL

Comments: A further herpetological edition in the Checklist series begun by NCC in 1979, revised and brought up to date with current CITES listings

Restrictions: None

Distribution:

JNCC report collection	2 copies
Nature Conservancy Council for England, HQ, Library	1 copy
Scottish Natural Heritage, HQ, Library	1 copy
Countryside Council for Wales, HQ, Library	1 copy
A T Smail, Copyright Libraries Agent, 100 Euston Road, London, NW1 2HQ	5 copies
British Library, Legal Deposit Office, Boston Spa, Wetherby, West Yorkshire, LS23 7BQ	1 copy
Chadwick-Healey Ltd, Cambridge Place, Cambridge, CB2 1NR	1 copy
BIOSIS UK, Garforth House, 54 Michlegate, York, YO1 1LF	1 copy
CITES Management and Scientific Authorities of EC Member States	total 30 copies
CITES Authorities, UK Dependencies	total 13 copies
CITES Secretariat	5 copies
CITES Animals Committee chairman	1 copy
European Commission DG XI/D/2	1 copy

Joint Nature Conservation Committee Report No. 237

• Checklist of reptiles and amphibians listed in the CITES appendices

compiled by the

World Conservation Monitoring Centre

Prepared under contract from the Joint Nature Conservation Committee by the **World Conservation Monitoring Centre**, Cambridge, UK. Established in 1988 as a company limited by guarantee with charitable status. WCMC is managed as a joint-venture between the three partners in the *World Conservation Strategy* and its successor *Caring For The Earth*: IUCN - The World Conservation Union, UNEP - United Nations Environment Programme, and WWF - World Wide Fund for Nature. The Centre provides information services on the conservation and sustainable use of species and ecosystems and supports others in the development of their own information systems.

Acknowledgements

This checklist was compiled by the World Conservation Monitoring Centre under contract F71-12-332 from the Joint Nature Conservation Committee.

The document was compiled by Brian Groombridge and produced by Helen Corrigan and Julie Reay. Mary Cordiner and Jessica Pullen provided other assistance.

We are grateful to E.N. Arnold for advice and access to information resources in the Amphibian and Reptile section at The Natural History Museum (London), and thank Stephen Edwards, Chairman CITES Nomenclature Committee, for assistance. David Denison provided a program to renumber the extensive reference list to this volume.

David Morgan of the JNCC International Policy Branch is thanked for providing expert advice and guidance throughout.

Introduction

In April 1991, the Nature Conservancy Council for England, Countryside Council for Wales and Scottish Natural Heritage acting together through the Joint Nature Conservation Committee were appointed by the Secretary of State for the Environment as the United Kingdom's Scientific Authority for Animals under the Convention on International Trade in Endangered Species of Wild Fauna and Flora (CITES). CITES regulates international trade in wild animals and plants and in products derived from them, to help to ensure their conservation on a worldwide scale.

The intention of this work is to provide a combined list of amphibian and reptile species appearing in Appendices I, II and III of CITES, indicating both the current Appendix and the IUCN conservation status category.

This revised edition incorporates additions and amendments to the CITES appendices up to and including those made at the 9th Meeting of the Conference of the Parties in Florida in November 1994 (effective from 16 February 1995). The IUCN status categories given here are those current at the time of preparation, as represented in the *1994 IUCN Red List of Threatened Animals* (Groombridge, 1993).

For background material on the rationale of the IUCN threat categories, readers are referred to Groombridge (1993); for background on the workings of CITES, recommended works are Favre (1989) and Wijnstekers (1992). For information by country on the diversity and status of amphibians, reptiles and other taxonomic groups, and for a general review of biodiversity, readers are referred to WCMC (1992) and WCMC (1994).

In a publication of this nature, it is inevitable that users will discover entries that need correcting or updating. The publishers would be grateful if their attention could be drawn to these entries, and the World Conservation Monitoring Centre would be grateful to receive details of such changes so that they can be incorporated in the database from which this publication is produced.

Explanatory notes

Each species is typically represented by a block of text; including scientific name (with alternatives), Common names in the three official CITES languages (where available), geographic range, CITES Appendix, Red List category, and numerical reference codes. Where a species has component populations or formal subspecies which are treated differently by CITES, the species entry is subdivided appropriately.

Scientific names

Nomenclature follows that used in the CITES Appendices for the forms appearing therein.

For each taxon listed, the scientific name and authority is given first, with alternative names given in parentheses on the following line. In the majority of cases these alternatives are the most frequent synonyms in current use. In a few cases, these are recently proposed taxonomic changes not yet in common use, and in others the scientific name in parentheses is that accepted by taxonomists, but not the name used in the CITES Appendices.

The sequence of families within orders also conforms to the CITES Appendices (thus the amphibian families are in alphabetical order while the reptile families follow a conventional systematic order). The genera and species are in alphabetical order within each family. The primary taxonomic source followed for most of the groups covered is given below; the numerous later changes and additions to these checklists are referenced separately in the relevant species entries.

Amphibians: (Frost, 1985 and Duellman, 1993) adopted by the CITES parties as the standard reference to amphibian nomenclature.

Testudines: Iverson (second edition, 1992).

Crocodylia and Rhynchocephalia: King and Burke (1989).

Gekkoniidae (Wermuth, 1965; Kluge, 1991).

Agamidae (Wermuth, 1967).

Chamaeleonidae (Mertens, 1966; Klaver and Böhme, 1986).

Iguanidae (several sources, see individual entries).

Cordylidae (Wermuth, 1968; Branch, 1988).

Teiidae (several sources, notably Peters and Donoso-Barros, 1970).

Helodermatidae and Varanidae (Mertens, 1963).

Boidae (Stimson, 1969; Sheplan and Schwartz, 1974; Underwood and Stimson, 1990).

Colubridae (several sources, see individual entries).

Elapidae and Viperidae (Klemmer, 1963; Leviton, 1968).

Common names

Common names and trade names appear below the scientific names; few of the listed taxa have regularly or universally used common names. In some cases, identical trade names appear to be used for different taxa.

Geographical range

After the scientific and common names of each taxon, the geographical range is given in terms of political units, listed in alphabetical order. In several cases, particularly where islands are concerned, further distribution details are given thus 'Indonesia: Sumatra'. When the name of a country is given as part of the range of a certain species, that species may not occur throughout the country and may even be of only peripheral occurrence.

A question mark '?' has been used in front of a country to indicate that there is some uncertainty in the status of the species in that country.

A country where the species is known to be extinct is denoted by '(ex)', or by '(ex?)' where there is still a small possibility that the species survives.

'[]' denotes a range state where the species has been introduced.

Other information

The three columns headed CITES, RL and Ref, list the following information for each taxon.

CITES

I, II or III, referring to the CITES Appendix on which the taxon is listed as at 16 February 1995. The letters (eq) after an Appendix II entry denote that the population is on Appendix II subject to an export quota. The letters following Appendix III entries denote the country whose government placed the taxon in this category, as follows: GH, Ghana; HN, Honduras; IN, India.

RL

Threat categories follow those given in the 1994 *IUCN Red List of Threatened Animals* and are as follows:

- E Endangered
- V Vulnerable
- R Rare
- Id Indeterminate (given as "I" in IUCN Red List, but modified here to avoid confusion with the CITES "I" entry)
- K Insufficiently known; suspected of being threatened, but without full data
- not listed: note that this includes species which have not yet been evaluated for threatened status as well as those which have been evaluated and found not to be threatened.

No Red List category is given in those few instances where a particular subspecies appears in the IUCN Red List but not the species as a whole

References

The numbers in the column on the far right refer to an entry in the reference list at the back of this document. These references contain information on the status, distribution or nomenclature of the species in question. Most are secondary sources which give access to further references. This list is for general guidance, and is in no way intended to approach a full bibliography. References which refer to the species in only a limited part of its range are generally included in square brackets after the appropriate country in the geographical range information.

Names of countries and dependent territories

This checklist has been made as compact as possible by listing names of countries and dependent territories in the shorter forms given by United Nations (1993). Within the text, Czechoslovakia and Yugoslavia are used to denote the geographic areas as recognised by United Nations (1993).

Countries for which shorter forms of names are used and their shortened form:

Brunei Darussalam	Brunei
Democratic People's Republic of Korea	D.P.R. Korea
Falkland Islands and Dependencies	Falkland Islands
Islamic Republic of Iran	Iran
Lao People's Democratic Republic	Lao P.D.R.
Libyan Arab Jamahiriya	Libya
Northern Mariana Islands	Northern Marianas
Republic of Korea	Korea Republic
Saint Vincent and the Grenadines	Saint Vincent
Syrian Arab Republic	Syria
United Republic of Tanzania	Tanzania
United Kingdom of Great Britain and Northern Ireland	United Kingdom
United States of America	USA

In the text, parent countries of several island groups are omitted. These are listed below:

American Samoa, USA	Madeira, Portugal
Anguilla, United Kingdom	Marshall Islands, USA
Aruba, Netherlands	Martinique, France
Ascension Islands, United Kingdom	Mayotte, France
Azores, Portugal	Montserrat, United Kingdom
Bermuda, United Kingdom	Netherlands Antilles, Netherlands
Bouvet Island, Norway	New Caledonia, France
British Antarctic Territory, United Kingdom	Niue, New Zealand
British Indian Ocean Territory, United Kingdom	Norfolk Island, Australia
British Virgin Islands, United Kingdom	Northern Marianas, USA
Canary Islands, Spain	Palau, USA
Canton and Enderbury Islands, Kiribati	Panama Canal Zone, USA
Cayman Islands, United Kingdom	Pitcairn Islands, United Kingdom
Channel Islands, United Kingdom	Puerto Rico, USA
Christmas Island, Australia	Queen Maud Land, Norway
Cocos (Keeling) Islands, Australia	Réunion, France
Cook Islands, New Zealand	Saint Helena, United Kingdom
Falkland Islands, United Kingdom	Saint Pierre and Miquelon, France
Faeroe Islands, Denmark	Saint Vincent, United Kingdom
Federated States of Micronesia, USA	South Orkney Islands, United Kingdom
French Guiana, France	South Sandwich Islands, United Kingdom
French Polynesia, France	South Georgia, United Kingdom
French Southern and Antarctic Territories, France	South Shetland Islands, United Kingdom
Gibraltar, United Kingdom	Svalbard and Jan Mayen Islands, Norway
Greenland, Denmark	Tokelau, New Zealand
Guadeloupe, France	Tristan da Cunha Islands, United Kingdom
Guam, USA	Turks and Caicos Islands, United Kingdom
Guernsey, United Kingdom	Virgin Islands of the United States, USA
Hawaiian Islands, USA	Wallis and Futuna, France
Heard and Macdonald Islands, Australia	
Hong Kong, United Kingdom	
Isle of Man, United Kingdom	
Jersey, United Kingdom	
Johnston Atoll, USA	
Macao, Portugal	
Macquarie Island, Australia

 S: Tortuga marginada
 Albania; Greece [256]; [Italy]: [Tuscany], [Sardinia]

Family CHELONIIDAE

Countries below outline species' ranges in general terms, and list countries where nesting has been recorded (without differentiating between occasional, minor, or major nesting). Because of the wide and somewhat unpredictable distribution of sea turtles away from their nesting beaches, it is impractical to list all those countries in whose territorial waters individual sea turtles may be expected to occur. This applies to the CHELONIIDAE and DERMOCHELYIDAE.

Caretta caretta (Linnaeus 1758)

I V 17,32,33,113,175,240,252,353,467,480,551

E: Loggerhead; F: Caouanne, Coffre, Tortue à bahut, Cayuanne; S: Cayuma, Tortuga Boba
 Nesting recorded on beaches of tropical, subtropical and temperate seas (Atlantic, Caribbean, Indian, Mediterranean, Pacific). Wandering individuals recorded in temperate and arctic waters (to 70°N at Murmansk, Russia, and to 35°S at Rio de la Plata, Argentina)
 ?Angola [114]; Australia [331,335]; Bahamas; Bangladesh [298]; Belize [405]; Brazil [475]; British Virgin Islands; ?Cape Verde [87]; Cayman Islands [447]; China: Xisha Islands [126,195]; Colombia [438]; Costa Rica [77,138]; Cuba [360]; Cyprus [159]; Dominican Republic; Egypt; France: Corsica (ex); Greece; Grenada [183]; Guadeloupe [201]; Guatemala [340]; Haiti [293]; Honduras [138,177]; ?India; Indonesia [507]; Israel; Italy; Jamaica [294]; Japan [553,579]; Libya; Madagascar; Mexico [130,361,362,405]; Montserrat; Morocco [87]; Mozambique [269]; ?Myanmar; Namibia [269]; New Caledonia [461,465]; Nicaragua [138,414]; Oman [500]; Panama [138,163]; ?Papua New Guinea [548]; Philippines [155]; Puerto Rico [225]; Saint Lucia [425]; Senegal [87,172,357]; South Africa [269]; Sri Lanka [292]; Turkey [214,215]; Turks and Caicos Islands [189]; USA [49,134,174,175]; Venezuela [463,467]

Chelonia mydas (Linnaeus 1758)

I E 32,33,113,240,241,252,346,300,353,399,402,439,446,562,480,551

(including *Chelonia agassizii* Bocourt 1868, East Pacific Turtle or Black Turtle, present in the eastern Pacific and sometimes treated as a full species, eg. [280, 562]; this is now considered inappropriate (K. Bjørndal, cited in [241])).

E: Green Turtle; F: Tortue verte, Tortue blanca; S: Tortuga Verde, Tortuga blanca

Nesting recorded on beaches of tropical and subtropical seas (Atlantic/Caribbean, India, Mediterranean, Pacific); wandering individuals recorded in temperate waters (to 52°N in the English Channel and to 43°S in Chile). Major breeding and feeding areas between 20°N and 20°S. Most numerous in Australia and Indonesia, large nesting populations also exist in Costa Rica (at Tortuguero on the Caribbean coast) and at several sites around the Indian Ocean.

<i>Lepidochelys kemp</i> (Garman 1880)	I	E	32,33,108,113,191,254,353,36 2,363,364,375,480,501,551,617
--	---	---	---

E: Kemp's Ridley, Atlantic Ridley, Gulf Ridley, Mexican Ridley; **F:** Tortue bâtarde, Tortue de kemp Caret des Antilles; **S:** Tortuga Marina Bastarda, Tortuga Lora, Cotorra

Nesting is largely confined to Mexico (Rancho Nuevo); other records are unconfirmed or involve one or few individuals. At sea, present in the Gulf of Mexico, but regular in Atlantic waters and known from the Mediterranean).

?Colombia; Mexico: Rancho Nuevo on the Gulf coast (Tamaulipas State)[363,501], Tecolutla and Tuxpan (Veracruz); USA: Mustang Island, Padre Island (Texas), Madiera Beach (Florida); [USA]: [Padre Island] [501,617]

Lepidochelys olivacea (Eschscholtz 1829) I E 32,33,113,353,467,480,551,477
E: Olive Ridley, Pacific Ridley; **F:** Tortue livâtre; **S:** Tortuga Golfina, Tortuga olivacea
 Nesting recorded on beaches of tropical and subtropical seas (Atlantic, Indian, Pacific), most sites between 30°N and 20°S. Major mass nesting occurs at Gahirmatha in Orissa State, India; Nancite and Ostional on the Pacific coast of Costa Rica; and at a now reduced number of sites on the Pacific coast of Mexico. Occasionally recorded in the Caribbean, but nests rarely if at all.
 Angola [87,114,269]; Australia [331]; Bangladesh [297,298,512]; Brazil [475]; China; Costa Rica [77,138,139,140]; El Salvador [138]; French Guiana [200]; Guatemala [138]; Guyana [478]; Honduras [138]; India [292,529]; Indonesia [437,507]; Kenya [193]; Madagascar; Malaysia: Peninsular Malaysia [326,534], Sarawak; Mexico [130]; Mozambique [269]; Myanmar [292,368,509]; Nicaragua [138]; Oman [500]; Pakistan [184,291]; Panama [138]; Papua New Guinea [548]; Peru [249]; Senegal [87]; South Africa; Sri Lanka [292]; Suriname [409,476,477,521]; Taiwan; Tanzania [193]; Thailand [34]; Trinidad and Tobago [122]; Venezuela [463,467]

 (= *N. depressa*, *Chelonia depressa*)
E: Flatback; **F:** Tortue franche du Pacifique; **S:** Tortuga franca oriental
 Australia: nests in north and north-east [331,332,335,338]; recorded at sea in Indonesia [437] and Papua New Guinea [548]

Family DERMOCHELYIDAE (see note under CHELONIIDAE)

Dermochelys coriacea (Vandelli 1761) I E 32,33,113,321,353,424,466,480,551
E: Leatherback, Leathery Turtle, Luth, Trunkback turtle; **F:** Tortue Luth; **S:** Tortuga laud
 Nesting recorded on beaches of tropical and subtropical seas (Atlantic, Indian, Pacific), notably in Pacific Mexico, Irian Jaya (Indonesia), Malaysia (Peninsular Malaysia) and French Guiana. Most sites between 30°N and 20°S. Foraging populations regularly occur in cool temperate waters, including areas off the Atlantic coasts of North America and Europe, the Mediterranean [240,246], and off south-east Australia and western South America.
 Angola [114,269]; Anguilla [482]; Antigua and Barbuda [290]; Australia [331,336]; Brazil [475]; British Virgin Islands [190]; China; ?Colombia; Costa Rica [77,138,139]; Cuba [360]; Côte d'Ivoire; Dominica [173]; Dominican Republic; Ecuador [235]; El Salvador [138]; Fiji [461]; French Guiana [200]; Ghana; Grenada [183]; Guadeloupe [201]; Guatemala [340]; Guyana [478]; Honduras [177]; India [292,529]; Indonesia [38,437,457,507]; Israel (ex?); Italy: Sicily (ex); Liberia; Malaysia: Peninsular Malaysia [326,534]; Martinique [199]; Mexico [130,362,405]; Montserrat [281]; Mozambique [269]; Myanmar [368,509]; Netherlands Antilles [583]; Nicaragua [138,414]; Panama [138,163,403]; Papua New Guinea [468,548,549]; ?Peru; Puerto Rico [225]; Saint Kitts-Nevis [615]; Saint Lucia [425]; Saint Vincent [417]; Senegal [172,357]; Solomon Islands [461]; South Africa [269]; Sri Lanka [292]; Suriname [409,476,521]; Taiwan; Thailand [34,457]; Togo; Trinidad and Tobago [122]; USA; ?Venezuela [463,467]; Virgin Islands of the United States; Zaire

Crocodylus raninus Müller & Schlegel 1844 I/II - 496,497

(= *Crocodylus porosus*)

(The name *Crocodylus raninus* has long been in the synonymy of *Crocodylus porosus*; it has recently been resurrected for a palustrine species known by material from the island of Borneo [496,497]). The appropriate CITES listing remains to be determined.

Family CHAMAELEONIDAE

The genera *Chamaeleo* and *Bradypodion* are listed in Appendix II of CITES. Klaver and Böhme [306] reassigned many species formerly placed in *Chamaeleo* to *Bradypodion*, *Calumma* and *Furcifer*. The list below follows their concept of *Bradypodion* but conservatively, and in order to reflect better the original intention of CITES, the other relevant species are here retained under *Chamaeleo*.

<i>Bradypodion adolfifriederici</i> Sternfeld 1912 (= <i>Chamaeleo adolfifriederici</i>) Rwanda [258]; Uganda; Zaire	II	-	306
---	----	---	-----

<i>Bradypodion caffer</i> Boettger 1889 (= <i>Bradypodion cafferum</i>) E: Transkei Dwarf Chameleon South Africa [71]	II	-	306,472

Family CORDYLIDAE

The Genera *Cordylus* and *Pseudocordylus* are listed by CITES. The delimitation of species within these genera has long been unstable; although the status of many populations has now been clarified [71,72], those in some areas (eg. Angola, Zaire) remain to be fully investigated.

<i>Cordylidae</i>	CITES	RL	Ref
<i>Cordylus campbelli</i> FitzSimons 1938 E: Campbell's Girdled Lizard Namibia [71]	II	-	604
<i>Cordylus cataphractus</i> Boie 1828 E: Armadillo Girdled Lizard ?Namibia; South Africa [71]	II	V	72,604
<i>Cordylus coeruleopunctatus</i> Methuen & Hewitt 1913 E: Blue-spotted Girdled Lizard South Africa [71]	II	-	72,604
<i>Cordylus cordylus</i> (Linnaeus 1758) (most of ten subspecies recognised by Wermuth [604] have since been elevated to species rank; the position of <i>angolensis</i> is not entirely clear, it is here included in <i>Cordylus tropidosternum</i> , but is alternatively retained in <i>C. cordylus</i>) E: Common Girdled Lizard, Cape Girdled Lizard, Rough-scaled Girdled Lizard ?Lesotho; South Africa [71]	II	-	72,604
<i>Cordylus giganteus</i> Smith 1844 E: Giant Girdled Lizard, Giant Zonure, Sungazer South Africa [71]	II	V	72,604
<i>Cordylus jordani</i> (Parker 1936) (= <i>Cordylus polyzonus jordani</i>) E: Jordan's Girdled Lizard Namibia [71]	II	-	71,72
<i>Cordylus lawrencei</i> FitzSimons 1939 (= <i>Cordylus cordylus lawrencei</i>) E: Lawrence's Girdled Lizard South Africa [71]	II	R	72,604
<i>Cordylus macropholis</i> (Boulenger 1910) E: Large-scaled Girdled Lizard South Africa [71]	II	-	72,604
<i>Cordylus mclachlani</i> Mouton 1986 E: McLachlan's Girdled Lizard South Africa [71]	II	R	72,421

Family TEIIDAE			
<i>Cnemidophorus hyperythrus</i> Cope 1863 E: Orange-throated Whiptail, Race-runner; S: Corredor Gorguinaranja Mexico: Baja California; USA: California	II	V	275
<i>Crocodilurus lacertinus</i> (Daudin 1802) E: Dragon Lizard Brazil; French Guiana [266] (Although the species has been reported from the Guianan region generally, according to Hoogmoed [263] and Hoogmoed and Lescure [266] it is absent from Guyana and Suriname)	II	-	451
<i>Dracaena guianensis</i> Daudin 1802 E: Caiman Lizard; skin: Croco-Teju, Jacuruxi, Cameleon Rojo Brazil [587]; Ecuador [408]; Peru [164]	II	-	349,451,587
<i>Dracaena paraguayensis</i> Amaral 1950 E: Caiman Lizard ?Bolivia; Brazil [587]; Paraguay [587]	II	-	451,587
The genus <i>Tupinambis</i> is listed on CITES Appendix II. The number of included species, their nomenclature and distribution, have been subject to much discussion, and the situation remains confused [349]. Peters and Donoso-Barros [451] recognise four species: <i>Tupinambis duseni</i> , known from a single record in Parana; <i>Tupinambis nigropunctatus</i> from the Amazon basin; <i>Tupinambis rufescens</i> from western Argentina, and <i>Tupinambis teguixin</i> from northern Argentina, Brazil and the Guianas. Presch [460] put <i>T. duseni</i> and <i>Tupinambis teguixin sebastiani</i> in the synonymy of <i>T. rufescens</i> , and <i>T. nigropunctatus</i> in the synonymy of <i>T. teguixin</i> (changes noted in the new introduction to the revised edition of [451]). This treatment has been widely opposed. Hoogmoed [263] and Hoogmoed and Lescure [266] argue that the <i>Tupinambis</i> of South America north of 15°S form a distinct species for which <i>nigropunctatus</i> is the correct epithet. There is also a strong case [586,588] that the populations in Uruguay and southern Brazil are correctly named <i>teguixin</i> rather than <i>rufescens</i> . The list below attempts a consensus of these views, but in the absence of a recent generic review this can only be a preliminary arrangement [349].			
<i>Tupinambis nigropunctatus</i> Spix 1825 E: Common Tegu, Banded Tegu; skin: Brazil Teju ?Bolivia; Brazil; Colombia; Ecuador [as <i>teguixin</i> 473]; French Guiana [266]; Guyana; Peru [as <i>teguixin</i> 185]; Suriname [590]; Trinidad and Tobago; Venezuela	II	-	349,460
<i>Tupinambis rufescens</i> (Günther 1871) (includes <i>Tupinambis duseni</i> [460]) E: Argentine Teju, Red Teju Argentina [116]; ?Bolivia; ?Brazil; Paraguay [436]	II	-	336,451,460
<i>Tupinambis teguixin</i> (Linnaeus 1758) E: Common Tegu, Banded Tegu; skin: Argentine Teju Argentina [116,165]; Bolivia; Brazil; Paraguay [436]; Uruguay [243]	II	-	349,460

<i>Varanus tristis</i> (Schlegel 1839) E: Freckled Monitor, Mournful Tree Monitor, Black-headed Monitor; F: Varan à tête noire; S: Varano de cabeça negra Australia	II	-	132,556
<i>Varanus varius</i> (White 1790) E: Lace Monitor, Common Tree Monitor; F: Varan bigarré; S: Varano arboricola comun Australia	II	-	132
<i>Varanus yemenensis</i> Böhme, Joger and Schatti 1989 Saudi Arabia; Yemen	II	-	60

Order SERPENTES

Family BOIDAE

The Family Boidae is listed collectively on Appendix II, with the exception of a few species listed on Appendix I. Differing opinions have been expressed about the species content of the family. Both McDowell [372] and Underwood [580] remove the genera *Exiliboa*, *Trachyboa*, *Tropidophis* and *Ungaliophis*; McDowell also removes *Loxocemus*, while Underwood retains *Loxocemus* and adds *Xenopeltis*. A consensus is developing for recognition of a separate family Tropidopheidae (the grammatically more correct alternative to 'Tropidophidae') for *Boella*, *Exiliboa*, *Trachyboa*, *Tropidophis* and *Ungaliophis* [373,485,535]. As an interim measure, and in order to reflect better the apparent intent of the CITES listing, the list below closely follows the conservative treatment by Stimson [554]. The genus *Morelia* has been revived to include species formerly assigned to *Bothrochilus*, *Chondropython*, and *Liasis*, and the Australo-Papuan species of *Python* [540,557,581]. The taxonomic position of several species is subject to discussion, eg. Kluge [310] (see comments below under *Acrantophis*, *Sanzinia* and *Xenoboa*).

<i>Acrantophis dumerili</i> Jan 1860 (according to Kluge [310], <i>Acrantophis</i> should be synonymised with <i>Boa</i>) E: Dumeril's Boa, Madagascar Ground Boa; F: Boa de Dumeril, Boa de Madagascar; S: Boa do Dumeril Madagascar; Réunion [introduced?] [73,310]	I	K	95,244,275,554
<i>Acrantophis madagascariensis</i> (Duméril & Bibron 1844) 1 (according to Kluge [310], <i>Acrantophis</i> should be synonymised with <i>Boa</i>) E: Madagascar Boa, Malgasy ground Boa; F: Boa de Madagascar; S: Boa de Madagascar meridional Madagascar	1	K	95,244,275,554
<i>Aspidites melanocephalus</i> (Krefft 1864) E: Black-headed Python; F: Python a tête noire d'Australie; S: Piton de cabeça negra Australia	II	-	132,554,557
<i>Aspidites ramsayi</i> (Macleay 1882) E: Ramsay's Python, Woma; F: Python de Ramsay; S: Piton de Ramsay Australia	II	E	132,538,554,557

<i>Tropidophis pilsbryi</i> Bailey 1937 E: Pilsbury's Dwarf Boa Cuba	II	-	212,524
<i>Tropidophis semicinctus</i> (Gundlach & Peters 1864) E: Banded Dwarf Boa Cuba	II	-	212,524
<i>Tropidophis taczanowskyi</i> (Steindachner 1880) E: Taczanowsky's Dwarf Boa ?Brazil; Ecuador [408]; Peru	II	-	554
<i>Tropidophis wrighti</i> Stull 1928 E: Wright's Dwarf Boa Cuba	II	-	212,524
<i>Ungaliophis continentalis</i> Müller 1882 E: Isthmian Dwarf Boa, Banana Boa, Chiapan Boa; Guatemala; Honduras [616]; Mexico: Chiapas	II	-	592
	F: Boa nain d'Amérique centrale; S: Boa enana del norte de centroamericano		

Ungaliophis panamensis Schmidt 1933 II - 592
E: Panamanian Dwarf Boa, Central American Dwarf Boa; **F:** Boa nain de Panama
 Colombia; Costa Rica [513]; Nicaragua [591]; Panama

Xenoboa cropanii Hoge 1953 II - 5
 (according to Kluge [310] *Xenoboa* should be synonymised with *Corallus*)
E: Cropan's Boa; **F:** Boa de Cropani; **S:** Boa costera de Brasil
 Brazil: Sao Paulo area

Family COLUBRIDAE

Atrretium schistosum (Daudin 1803) III IN - 541
E: Olive Keel-back
 Bangladesh [413]; India [146,541,607]; ?Lao P.D.R. [161]; Sri Lanka [111]

Cerberus rhynchops (Schneider 1799) III IN - 312
E: Dog-faced Water Snake, Bockadam
 Australia; Bangladesh; ?Brunei [471]; Cambodia [503]; India: including Andaman and Nicobar Islands [146,541,607]; Indonesia [153]; Malaysia: Peninsular Malaysia [576], ?Sabah [471], ?Sarawak [471]; Myanmar; ?Pakistan [406]; Palau Republic; Papua New Guinea [613]; Philippines; Sri Lanka [158]; Thailand [568]; Viet Nam [111]

Clelia clelia (Daudin 1803) II - 452
 (= *Pseudoboa cloelia*)
 (Snakes from Mexico and elsewhere in Central America formerly assigned to this species are now usually regarded as a full species *Clelia scytalina*)
E: Mussurana; **S:** Masurana
 Antigua and Barbuda (ex) [176]; Argentina [116]; Belize; Bolivia; Brazil [5]; Colombia; Costa Rica [513]; Dominica [176]; Ecuador [408]; El Salvador; French Guiana [124]; Grenada [137,176]; Guatemala; Guyana [264]; Honduras [616]; Nicaragua [591]; Panama; Paraguay; Peru [164]; Saint Lucia (ex) [136]; Suriname [264]; Trinidad and Tobago [176]; Uruguay; Venezuela [264]

Cyclagras gigas (Duméril, Bibron & Duméril 1854) II - 452
 (= *Hydrodynastes gigas* [166])
E: False Cobra, South American Water 'Cobra', Beach 'Cobra'; **S:** Falsa Cobra
 Argentina; Bolivia; Brazil [5]; French Guiana [124]; Paraguay

Elachistodon westermanni Reinhardt 1863 II R 209
E: Indian Egg-eating Snake; **S:** Culebra Tragahuevos India
 Bangladesh; India [541,607]; India [541,607]; Nepal [188]

Pryas mucosus (Linnaeus 1754) II - 492,541
E: Dhaman, Common Rat Snake, Oriental Rat Snake
 Afghanistan [330]; Bangladesh [413]; Cambodia [503]; China [9,459]; Hong Kong; India [146,541,607]; Indonesia: Java [44,262,492], ?Sumatra [153,492]; Iran [6]; Lao P.D.R. [161]; Myanmar; Nepal [563]; Pakistan [406]; Sri Lanka [158]; Taiwan [316]; Tajikistan; Thailand [568]; Turkmenistan [12,39]; Uzbekistan; Viet Nam [111]

Xenochrophis piscator (Schneider 1799) III IN - 541,607
 (= *Natrix piscator*)
E: Chequered Keelback, Common Scaled Water Snake, Fishing Snake
 Afghanistan [330]; Bangladesh [413]; ?Brunei; Cambodia [503]; China [9,459]; Hong Kong; India [146,541,607]; Indonesia: Java, Sumatra, ?Kalimantan [153]; Lao P.D.R. [161]; Malaysia: Peninsular Malaysia [576], ?Sabah [471], ?Sarawak [471]; Myanmar [541]; Nepal [563]; Pakistan [406]; Sri Lanka [158]; Taiwan [316]; Thailand [568]; Viet Nam [111]

<i>Elapidae</i>	CITES	RL	Ref
Family ELAPIDAE			
<i>Hoplocephalus bungaroides</i> (Schlegel 1837) E: Broad-headed Snake Australia: New South Wales	II	V	253
<i>Micrurus diastema</i> (Duméril, Bibron & Duméril 1854) E: Atlantic Coral Snake, Variable Coral Snake Belize; Guatemala; Honduras [616]; Mexico	III HN	-	62,110
<i>Micrurus nigrocinctus</i> (Girard 1854) E: Central American Coral Snake, Black-banded Coral Snake Belize; Colombia; Costa Rica [237,513]; El Salvador; Guatemala; Honduras [616]; Mexico; Nicaragua [591]; Panama	III HN	-	62,110
The 'Asiatic Cobra' <i>Naja naja</i> is listed on Appendix II. Several of the populations formerly attributed to this taxon have been elevated to species rank by Wüster and Thorpe [620]. These authors recognise eight species, listed below, and note that further study may result in more species being recognised in future.			
<i>Naja atra</i> Cantor 1842 E: Chinese or Indochinese Spitting Cobra Cambodia; China; Lao P.D.R.; ?Myanmar; Taiwan; Thailand; Viet Nam	II	-	329,620
<i>Naja kaouthia</i> Lesson 1831 E: Monocellate Cobra Bangladesh; ?Bhutan; Cambodia; India: including Andaman Islands; Lao P.D.R.; Malaysia: Peninsular Malaysia; Myanmar; ?Nepal; Thailand; Viet Nam	II	-	329,620
<i>Naja naja</i> (Linnaeus 1758) E: Indian Spectacled Cobra Bangladesh; India; Nepal; Pakistan; Sri Lanka	II	-	329,620
<i>Naja oxiana</i> (Eichwald 1831) E: Central Asian or Oxus Cobra Afghanistan [330]; India: Jammu and Kashmir [146,541,607]; Iran [6]; Pakistan [406]; Tajikistan; Turkmenistan [12,39]; Uzbekistan	II	K	224,275,285,329,620

Family VIPERIDAE

Agkistrodon bilineatus (Günther 1863) III HN - 110,221
E: Cantil
 Belize; Costa Rica [513]; El Salvador; Guatemala; Honduras [616]; Mexico; Nicaragua [591]

Bothrops asper (Garman 1883) III HN - 62,616
(sometimes = *Bothrops atrox* Linnaeus 1758 [part])
(The taxonomy of Central American populations [*asper*] in relation to those of the Amazon basin [*atrox*] is not clear. The specific epithet *asper* has been applied to Mexican and Central American populations when they are regarded as specifically distinct from Amazonian populations [1st edition,616]; alternatively, all these populations may be treated as conspecific, and the epithet *atrox* has precedence [2nd edition,616]. The range below excludes the Amazonian *B. atrox*, and is derived from [110]).

E: Terciopolo
Belize; Colombia; Costa Rica [513]; Ecuador [408]; Guatemala; Honduras [616]; Mexico; Nicaragua [591];
Panama; ?Trinidad and Tobago [110]

Bothrops nasuta Bocourt 1868 III HN - 62,110,185
(= *Bothrops nasutus*, *Porthidium nasutum* [110])
E: Rainforest Hog-nosed Pit Viper, Horned Hog-nosed Pit Viper
Belize; Colombia; Costa Rica [513]; Ecuador [408]; Guatemala; Honduras [616]; Mexico; Nicaragua [591];
Panama

Bothrops nummifer (Rüppell 1845) III HN - 62,110
(= *Bothrops nummifera*, = *Porthidium nummifer* [110])
E: Jumping Pit Viper
Belize; Costa Rica [513]; El Salvador; Guatemala; Honduras [616]; Mexico; Nicaragua [591]; Panama

Bothrops ophryomegas Bocourt 1868 III HN - 62,110
(= *Porthidium ophryomegas* [110])
E: Slender Hog-nosed Pit Viper, Corniz, Western Hog-nosed Viper
?Belize; Costa Rica [513]; El Salvador; Guatemala; Honduras [616]; Nicaragua [591]; ?Panama

Bothrops schlegelii (Berthold 1846) III HN - 62,110
(= *Bothriechis schlegelii* [110])
E: Eyelash Palm Pit Viper, Eyelash Viper, Horned Palm Viper
Belize; Colombia; Costa Rica [513]; Ecuador [408]; El Salvador; Guatemala; Honduras [616]; Mexico;
Nicaragua [591]; Panama; Venezuela

Crotalus durissus Linnaeus 1758 III HN - 62
E: Neotropical Rattlesnake, Cascabel
 Argentina [116]; Belize; Bolivia; Brazil [5]; Colombia; Costa Rica [513]; ?El Salvador; French Guiana [124];
 Guatemala; Guyana [264]; Honduras [616]; Mexico; Nicaragua [591]; Paraguay; ?Peru; Suriname [264];
 Uruguay; Venezuela [264]

Vipera russellii (Shaw 1797) III IN - 86,329,541
(= *Daboia russellii*, *Vipera russellii*)
E: Russell's Viper
Bangladesh [413]; Bhutan [541]; Cambodia [503]; China [9,459]; India [146,541,607]; Indonesia: Java, Lesser
Sundas [25,86,153]; Lao P.D.R. [161]; Myanmar [541]; Nepal; Pakistan [406]; Sri Lanka [158]; Taiwan [316];
Thailand [568]; ?Viet Nam

Vipera ursinii (Bonaparte 1835) 1 - 90,261,314,504
European populations (except former USSR) only
E: Orsini's Viper, Meadow Viper; F: Vipère d'Orsini
Albania [90]; Austria (ex?) [216,346,347]; Bulgaria [558]; France [505]; Greece; Hungary [558]; Italy [89]; Romania [558]; Turkey [41,285]; Yugoslavia [558]

Vipera wagneri Nilson & Andr  n 1984

II

Id

433

(taxonomic status uncertain according to [515,516]; but see [434])

E: Wagner's Viper

?Iran [432]; Turkey [286,435]

Class: AMPHIBIA

Order CAUDATA (URODELA)

Family AMBYSTOMATIDAE (= AMBYSTOMIDAE)

Ambystoma dumerilii (Dugès 1870) II - 203,275
 E: Lake Patzcuaro Salamander; F: Salamandre du lac Pátzcuaro; S: Ajolote de lago Pátzcuaro
 Mexico: San Juan del Rio, Lake Patzcuaro

Ambystoma mexicanum (Shaw 1789) II R 203,275
 E: Axolotl; F: Axolotl; S: Ajolote Mejicano
 Mexico: Lake Xochimilco region

Family CRYPTOBRANCHIDAE

Andrias davidianus (Blanchard 1871) I Id 203,268,275
 (= *Megalobatrachus davidianus*)
 E: Chinese Giant Salamander; F: Salamandre géante de Chine; S: Salamandra Gigante de China
 China: tributaries of Yangzi, Yellow and Pearl Rivers

Andrias japonicus (Temminck 1836) I R 203,275
 (= *Megalobatrachus japonicus*)
 E: Japanese Giant Salamander; F: Salamandre géante de Japon; S: Salamandra Gigante del Japón
 Japan: south-west Honshu, central Kyushu

Order ANURA

Family BUFONIDAE

Atelopus varius zeteki Dunn 1933 I - 203
 (*Atelopus* is sometimes assigned to a separate family ATELOPODIDAE)
 E: Golden Frog, Zetek's Golden Frog; F: Grenouille dorée du Panama; S: Rana Venenosa de Zetek
 Panama: Cerro Campana, Valle de Anton

Bufo periglenes Savage 1967 "1966" I E 203,275,513
 E: Golden Toad, Orange Toad; F: Crapaud doré; S: Sapo dorado de Monteverde
 Costa Rica: Cordillera de Tilaran (ex?) [144]

Bufo retiformis Sanders & Smith 1951 II V 203,270,275
 E: Sonoran Green Toad; F: Crapaud vert du Sonora; S: Sapo Verde de Sonora
 Mexico: Sonora; USA: Arizona

Bufo superciliaris Boulenger 1888 "1887" I - 203
 E: Cameroon Toad; F: Crapaud du Cameroun; S: Sapo dal Camerún
 ?Benin; Cameroon; ?Central African Republic; ?Congo; Côte d'Ivoire; Equatorial Guinea; Gabon; Ghana;
 ?Liberia; Nigeria; ?Togo; Zaire

Nectophrynoides cryptus Perret 1971 I - 203
 E: African Viviparous Toad; F: Crapaud vivipares; S: Sapo viviparos africanos
 Tanzania: Uluguru Mtns.

<i>Nectophrynoides wendyae</i> Clarke 1988 Tanzania: Uzungwe Mtns	I	-	128

Family DENDROBATIDAE

The genera *Dendrobates* and *Phyllobates* were added to Appendix II of CITES in 1987. Shortly before this amendment came into effect Myers [426] published two new generic names, *Epipedobates* and *Minyobates*, to accommodate many species formerly assigned to *Dendrobates* and *Phyllobates*. In order to reflect better the original intention of CITES the list below is based mainly on Frost [203], and combinations using other generic names are given in parentheses. Species newly described in the genus *Epipedobates* and *Minyobates* are not included, see [170] for a recent listing.

<i>Dendrobates abditus</i> Myers & Daly 1976 (= <i>Minyobates abditus</i> [426]) Ecuador [408]	II	-	203,408
<i>Dendrobates altobueyensis</i> Silverstone 1975 (= <i>Minyobates altobueyensis</i> [426]) E: Golden Poison-arrow Frog Colombia	II	-	203
<i>Dendrobates andinus</i> Myers & Burrowes 1987 (= <i>Epipedobates andinus</i> [426]) Colombia	II	-	427
<i>Dendrobates arboreus</i> Myers, Daly & Martinez 1984 Panama	II	-	203

<i>Dendrobatidae</i>	CITES	RL	Ref
<i>Dendrobates auratus</i> (Girard 1855) E: Green Poison-arrow Frog, Green and Black Poison-arrow Frog; F: <i>Dendrobate doré</i> Colombia; Costa Rica [513]; [Hawaiian Islands]: [Oahu]; Nicaragua [590,591]; Panama	II	-	203
<i>Dendrobates azureiventris</i> (Kneller & Henle 1985) (= <i>Phyllobates azureiventris</i> , <i>Epipedobates azureiventris</i> [426]) Peru	II	-	311,426
<i>Dendrobates azureus</i> Hoogmoed 1969 E: Blue Poison-arrow Frog, Giant Poison-arrow Frog Suriname	II	-	203
<i>Dendrobates bassleri</i> Melin 1941 (= <i>Epipedobates bassleri</i> [426], <i>Phobobates bassleri</i> [622]) E: Pleasing Poison-arrow Frog Peru	II	-	203
<i>Dendrobates biolai</i> Morales 1992 Peru	II	-	416
<i>Dendrobates bolivianus</i> (Boulenger 1902) (= <i>Epipedobates bolivianus</i> [426]) E: Bolivian Poison-arrow Frog Bolivia	II	-	203
<i>Dendrobates bombetes</i> Myers & Daly 1980 (= <i>Minyobates bombetes</i> [426]) Colombia	II	-	203,428
<i>Dendrobates boulengeri</i> (Barbour 1909) (= <i>Epipedobates boulengeri</i> [426]) E: Marbled Poison-arrow Frog Colombia; Ecuador [408]	II	-	203

<i>Phyllobates lugubris</i> (O. Schmidt 1857) E: Lovely Poison-dart Frog Costa Rica; Panama	II	-	203
<i>Phyllobates terribilis</i> Myers, Daly & Malkin 1978 Colombia	II	-	203,429

Phyllobates vittatus (Cope 1893) II - 203
E: Orange and Black, or Golfduicean Poison-dart Frog
 Costa Rica

Family MICROHYLIDAE

Dyscophus antongilii Grandidier 1877 I - 203,245,454
 (= *Discophus antongili*)
E: Tomato Frog
 Madagascar: Antongil Bay and south of Tamatave

Family MYOBATRACHIDAE

Rheobatrachus silus Liem 1973 II E 132,203,273,275,578
E: Platypus Frog, Conondale Gastric-brooding Frog
 Australia: Conondale and Blackall Ranges, Queensland (ex?) [577]

Rheobatrachus vitellinus Mahony, Tyler & Davies 1984 II E 203,273,356
E: Eungella Gastric-brooding Frog
 Australia: Eungella Nat. Park, Queensland (ex?) [577]

Family RANIDAE

Mantella aurantiaca Mocquard 1900 II - 22,203,602
 (The ranid subfamily Mantellinae, including *Mantella*, has been elevated to family rank: Mantellidae [170])
E: Golden Mantella; F: Grenouille dorée; S: Rana dorado
 Madagascar [54,107,245]

Rana hexadactyla Lesson 1834 II - 203
 (= *Euphlyctis hexadactylus* [169])
E: Six-fingered Frog; F: Grenouille hexadactyle, Grenouille de Bengale
 Bangladesh [272]; India [274]; Nepal; Sri Lanka [305]

Rana tigerina Daudin 1802 II - 203
 (= *Rana tigrina*, *Hoplobatrachus tigerinus* [66])
E: Tiger Frog, Indian Bullfrog; F: Grenouille-tigre
 Bangladesh [204,272]; Cambodia [67]; China [67]; India [274]; Lao P.D.R. [67]; [Madagascar]; Malaysia: Peninsular Malaysia [45,65]; Myanmar [67]; Nepal [563]; Pakistan [406]; Sri Lanka [305]; Taiwan; Thailand [566]; Viet Nam
 (Records of this species in Indonesia are likely to refer to allied species formerly included in *R. tigerina*)
